

# Dolphin Research Project, Namibia

By joining the team as an intern you will get the opportunity to gain in depth practical training in marine research techniques to study whales, dolphins and turtles. Working closely with principle investigators, interns will gain experience in:

- Taking photo-ID pictures
- Collecting behavioural data
- Data input
- Making acoustic recordings
- Shore based tracking of animals
- Attendance at whale and dolphin strandings
- Working with archived skeletal material
- Small boat skippering

Interns will also have the opportunity to join the community outreach programme, visiting local schools to increase marine awareness and education.

## Dates

Volunteers and Interns can join the project for 4 week up to 6 month durations.

## Requirements

Internship opportunities are open to current students (BSc or MSc) studying towards a biology or zoology related degree and recent graduates looking to gain experience in field work and research. Interns are expected to approach their duties with a mature and responsible attitude.

## Costs

The cost to join as a research intern is £1,720 for a 4 week placement. Costs for long term volunteers/ students are lower than for research interns, as the boat work component is less. The cost for 2 months is £700. Your payment covers all your food, accommodation and training during the project.
